Recommended for:

Hot water up to 100°C where steam is injected into the water for food handling or processing plant washdown service hose with a white cover and tube. Especially useful for dairy applications.

CAUTION: NOT RECOMMENDED FOR USE WITH PURE STEAM.

Temperature: -20°C to +100°C continuous service.

Construction:

Tube: Type P (EPDM). White.

Reinforcement: High tensile synthetic textile cord.

Cover: Type P (EPDM). White. All sizes are perforated.

Couplings: Gates GLX®

Packaging:

All sizes 100m per coil wrapped in PVC film.

Branding: Continuous ink print label.

Example:  113W Washdown 1 Inch (25.4mm) 200 PSI (1.38Mpa) WP

Standards: FDA Quality hose.

Recommended for:

Steam Queen features a specially compounded, perforated synthetic rubber cover intended for use where the hose is exposed to oils, grease, fats, and similar materials.

It will handle all types of steam - saturated and superheated - up to 250 psi +232°C.

WARNING: DO NOT ALTERNATE USE BETWEEN STEAM AND WATER.

232MB is designed with a 10:1 safety factor.

Temperature: -40°C to +232°C continuous service.

Construction:

Tube: Type P₂ (EPDM). Black.

Reinforcement: Braided, high tensile steel wire.

3/8" & 1/2": one-braid.

3/4" thru 2": two-braid.

Cover: Type B₁ (special compound designed to withstand heat and oil). Red. All sizes are perforated.

Packaging:

15m lengths: Coiled in a carton.

3/8" through 3/4": Packaged in 60m to 91m reels.

Maximum of 3 pieces. Minimum length 7m. One length under 30m.

Branding: Continuous moulded brand.

Example:  232MB Steam Queen® 3/4 Inch 2 Wire Braid 250 PSI WP at 450°F Degrees F Made In U.S.A.

Caution: Tighten Clamps Before Using.

Standards:

Cover: RMA (Class C) Limited oil resistance.
